

SampLogic

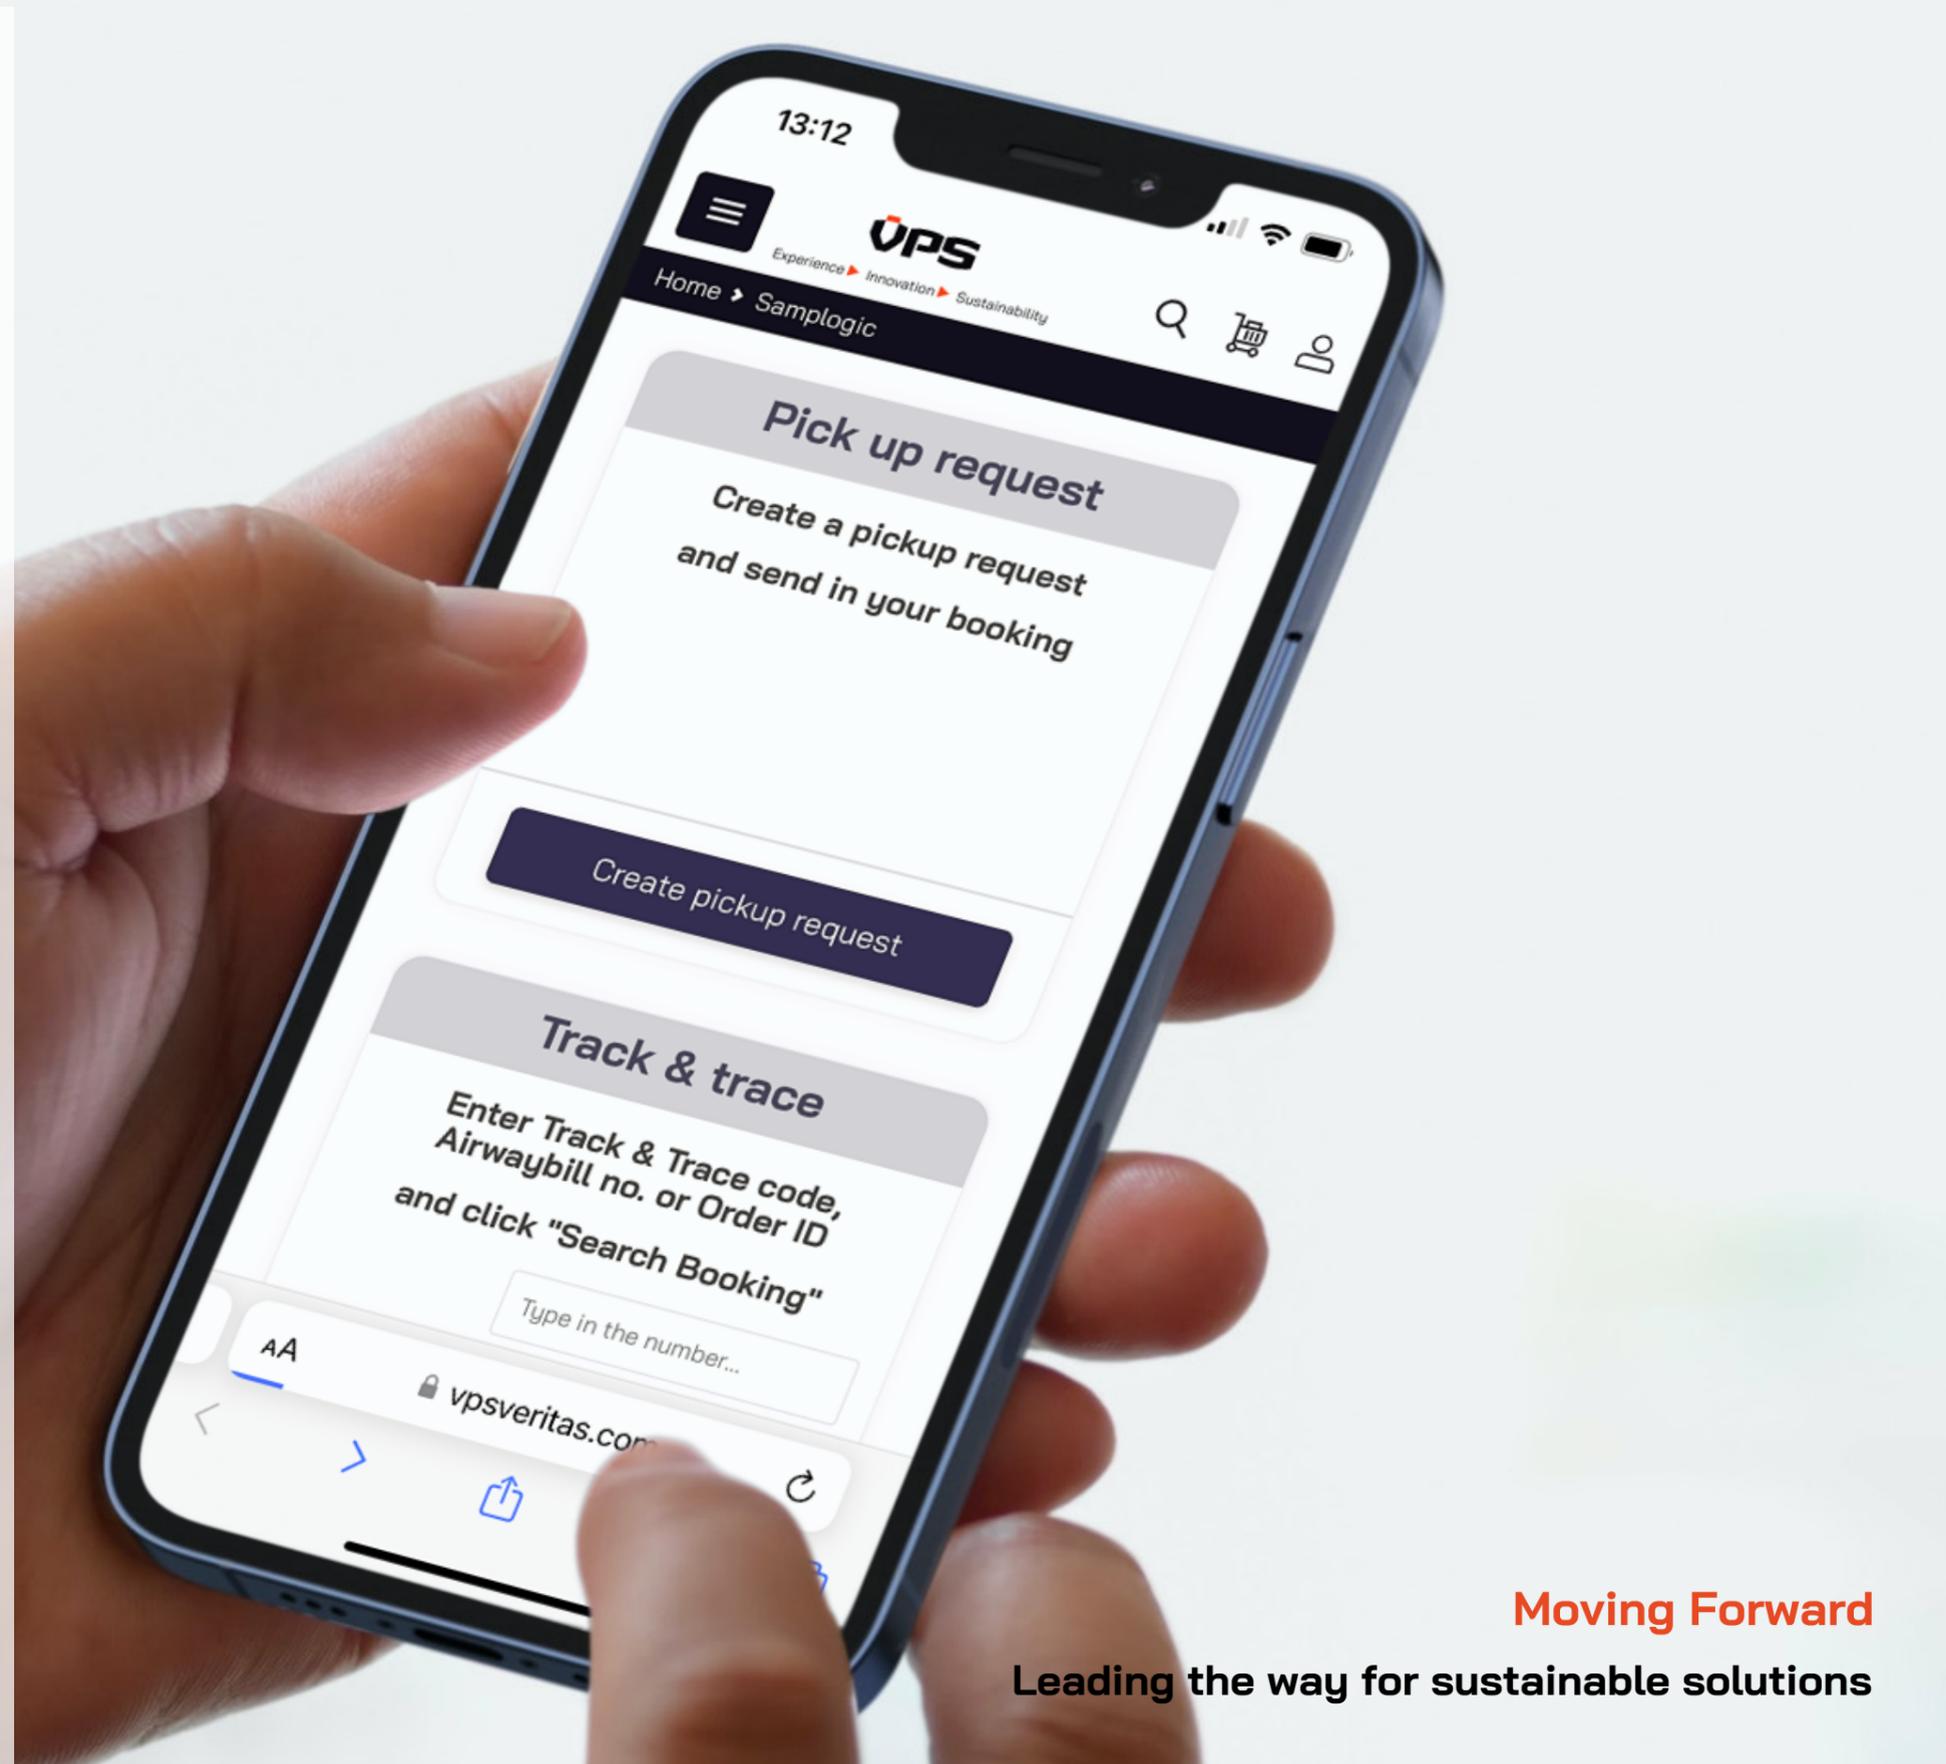

Your Fuel Management Partner

What is SampLogic?

SampLogic is a supply chain initiative provided free of charge by VPS. It offers both sample collection and tracking service to allow visibility to all activities involved in the transportation of samples, to the nearest VPS laboratory. SampLogic is seamlessly integrated with the booking and tracking systems of the global market leaders in international express delivery services, such as DHL and FedEx.

This tool provides a single point of contact where collection of bunker fuel samples can be arranged at any time and anywhere. The tracking function lets you to stay updated on the status of your sample shipment at any time. SampLogic helps streamline and eliminate manual processes in the sample transportation operations and reduce costs.

EXPERIENCE ► INNOVATION ► SUSTAINABILITY

Moving Forward

Leading the way for sustainable solutions

FEATURES OF SAMPLOGIC

Automated booking of fuel sample collection

With Samplogic, there is no longer a need to call the courier service providers (eg. DHL and FedEx) to arrange sample collection. Collection requests can be made online and sent electronically to the courier service providers, thereby reducing manual processing time and costs.

Automated generation of shipping documentation

Manual completion of shipping forms such as airway Bills and Pro Forma Invoices is time-consuming and may cause delays and extra costs. Samplogic caters for autogeneration of these documents, which saves time and reduces probability of errors.

Provides real-time information on the status of fuel sample

The VPS Order Number and the Airway Bill Number generated by Samplogic serve as references for tracking the status of shipment pick-up.

Automated alerts enable closer monitoring of fuel sample transportation

To ensure fuel samples are transported without delay, the alert mechanism in Samplogic automatically notifies VPS whenever a delay is detected, so that proactive actions can be taken.

EXPECTED BENEFITS

Samplogic utilises cutting edge technology in a secure, online environment to realise efficiencies and reduce costs for our customers. The benefits include:

Fastest delivery - Up to 1 day faster

Our analysis shows that samples sent by SampLogic arrive on average one day faster in our labs than samples not sent via SampLogic.

Global reach

The service works in all countries in the world and automatically selects the lab closest to the location that can test the sample. Shipping documents will include and adhere to all local requirements to ensure smooth shipping.

Easy to use

All paperwork will be sent by mail, tailored to your request and adjusted to local requirements. No agent handling is required which may save additional costs.

Active follow up

In case of unexpected issues VPS will follow up with the local courier to resolve the problems.

GETTING STARTED WITH SAMPLOGIC

We have several options for accessing Samplogic.

Using the online service

To make an online booking, visit our website at <https://samplogic.vpsveritas.com/>. Click on the Sample Booking icon and complete all the fields in the booking page. Select "Send" to submit collection request. Upon successful submission of the sample pickup request, a unique VPS order Number and airway Bill Number will be assigned.

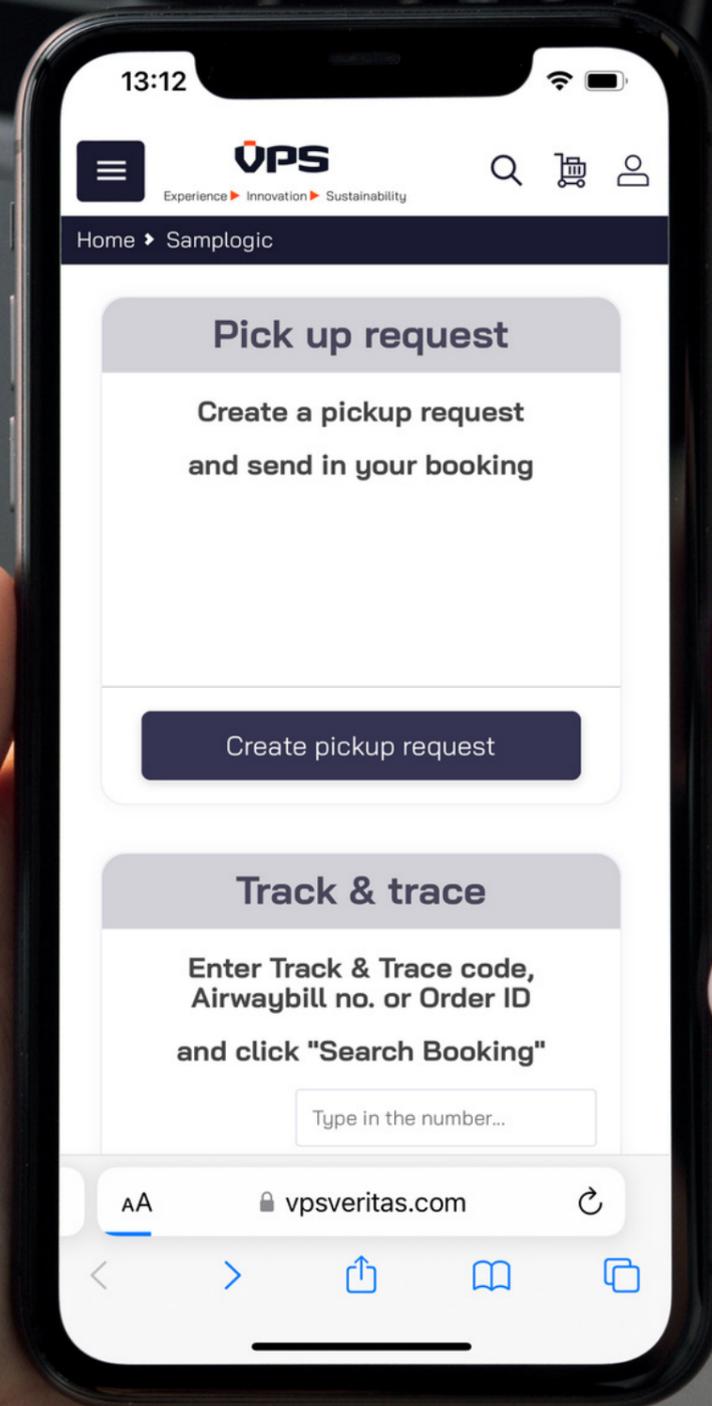

Use the Track and Trace icon to track your sample by entering the VPS order Number or airway Bill Number.

Clicking on the **User Guide** link on the Samplogic home page will provide you with instructions on how to submit a sample collection request and track the status of the sample.

Using the offline version

For vessels with restricted internet access, we recommend using the Offline Collection Form. Save the form to your Drive for access at all times: <https://samplogic.vpsveritas.com>

When using the offline form please make sure to use **Adobe Acrobat Reader** to create a pickup request otherwise you will not be able to submit the form.
