

VERITAS PETROLEUM SERVICES
FUEL QUALITY TESTING

A stylized world map in shades of blue and purple, overlaid with a network of glowing white lines and dots representing flight routes and hubs. The map is framed by a white border with a slight shadow effect.

WORLDWIDE
AIR COURIER
DIRECTORY
2016

1. Transportation of the fuel sample

Bunker fuel samples should be submitted to the laboratory for testing as soon as possible after the bunkering operation is completed.

VPS's Control Tower Integrated System (CTIS) shipping tool is designed to offer pickup of bunker fuel sample, generate the required shipping documents and to track the delivery status of the bunker fuel sample.

The CTIS offers the following benefits:

- A single point of contact to activate sample collection. All sample collection requests submitted will be transmitted electronically to VPS appointed courier service provider. There is no longer a need to call the courier service providers to arrange for sample collection.
- Prepare and manage the shipment faster and easier. There is no need to manually complete the shipping document. CTIS will use the booking details to generate the shipping document which are required to accompany the fuel samples.
- Sample collection request submitted to CTIS will be issued a tracking number which allow you to monitor the status of your sample at any time

Getting Started with CTIS:

CTIS is available to be used on vessels with or without internet access.

• Online Version

For vessels with the internet, please visit our website <http://www.v-p-s.com/ctis/home.aspx> to make a booking.

• Off line Version

In situations where there is limited access to the internet, please utilize the CTIS CD enclosed within the VPS sampling kit to download the CTIS software.

Alternatively, you may continue to refer to the VPS Air Courier Directory for contact details of the air courier companies for pickups.

2. How to use the Air Courier Directory (ACD)

Countries are listed in alphabetical order. Shown under each country is the colour of the appropriate address label to be placed on the Forwarding Box when despatching samples.

Example:

The ship may be bunkering in Hamburg, Germany. The Air Courier Directory shows that the label colour for Germany is pink, indicating that one of the pink address labels marked for the VPS laboratory in Rotterdam must be used.

Check the contact details of the DHL service centre.

DHL Airways GmbH

Phone: +49 18 0634 53003

ACCOUNT NO.: 962730810

For some countries, two different couriers are listed, one of which should be selected for the shipment.

3. Forwarding address

The laboratory address to which the sample should be sent is shown on the consignee shipping label (see page 2). Before affixing the address label, it is important to refer to the Air Courier Directory for details on the country to which the fuel sample should be dispatched so as to ensure that the correct label is used.

4. Contact with the courier service provider

The respective service centre of the VPS appointed courier companies should be contacted, giving the following information:

- Ship's name
- Complete collection address. Courier will not normally collect from a ship
- Shipper's name and telephone number
- Date and time samples should be collected
- Shipping Account Number - This account number indicates to the Service Centre that the shipment is acceptable for processing and that the shipper should not be charged. This is called "Destination Billing" - it means that Veritas Petroleum Services pay when the samples arrive at our laboratory.
 - For DHL, the VPS Universal Account Number (UAN) is 9627 30810

5. When the Courier arrives

Any package forwarded by a courier must be accompanied by an Airway Bill (AWB). The courier will provide an AWB to be completed with the following information:

"FROM" The name and address of the shipper. Enter the ship's name in the "Shipper's Reference".

"TO" Name and address of VPS' laboratory, as indicated on the address label.

6. Special instruction for Singapore

To arrange collection of the bunker fuel samples from the agent's office, please contact VPS Singapore at +65 9838 6488.

7. Special instructions for the Port of Rotterdam and Antwerp

VPS has established a network of sample 'drop off' points in the ports of Rotterdam and Antwerp. Please arrange with the ship's agent in Rotterdam and Antwerp to have the sample(s) dropped off at the nearest VPS collection point after he/she leaves the ship.

Locations and details of the sample drop off points are shown on page 4 (for Antwerp) and page 7 (for Rotterdam) of the Air Courier Directory.

When the ship's agent has decided which is the most convenient 'drop off' point to use, please ask him/her to read the following instructions:

On arrival at the 'drop off' point you should:

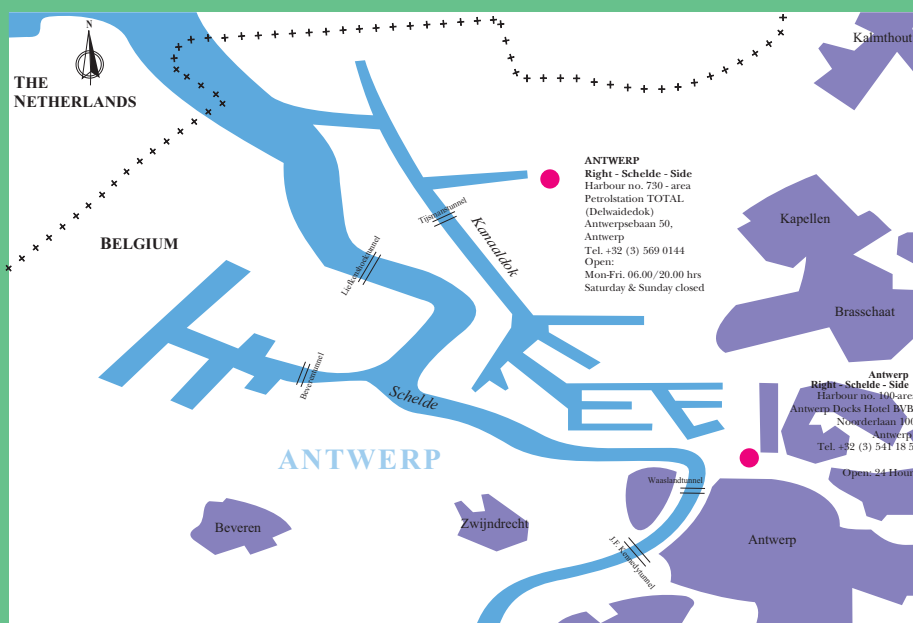

1. Ask the attendant for the VPS' logsheet and key.
 2. Complete the logsheet with date, time, name of the ship and number of samples delivered.
 3. Use the key to open the sample collection box.
 4. Place sample(s) together with Pro Forma Invoice in the collection box.
 5. Lock the box and return the key and the logsheet to the attendant. Any other confirmation to VPS is not necessary.
- The collection box will be emptied daily, except on Sundays.

If you experience any problems, please call the number given on the Forwarding Box label.

To ensure adherence to the legislation requirements in the export of bunker fuel samples from China, VPS will assist with the transportation of bunker fuel samples from China to VPS Singapore.

Once samples are landed, please email the following information to logistics@v-p-s.com.

- Vessel's Name
- Name of Shipping Agent
- Pickup Address
- Email address of the Shipping Agent
- The name and phone number of the person responsible for dispatching the fuel sample
- Date and time the sample(s) will be ready for collection

Veritas Petroleum Services (VPS) delivers testing, inspection and advisory solutions that help our customers achieve measurable improvements to fuel management, fuel cost, operational efficiency and compliance with marine fuel regulatory requirements.

In close collaboration with the industry, we introduced the first commercial bunker fuel testing and bunker quantity surveys for ships in 1981 and 1987, respectively. Today, customers remain at the heart of our business as we continue to expand our business.

We operate a global network of customer service offices supported round-the-clock by technical experts and four specialised and wholly-owned fuel testing laboratories strategically located in Rotterdam, Singapore, Houston and Fujairah. Our bunker quantity surveys are available at more than 200 key bunkering ports worldwide.
